

TCR TECHNICAL BULLETIN no. 06-2022

22/06/2022

*The current Technical Bulletin is with immediate application, and valid until further notice (modifications in **bold**).*

TCR TR - Art 10.7 - Springs:

1st Paragraph: *Cylindrical, linear steel springs are free; the combination of one helper with one suspension spring is allowed.*

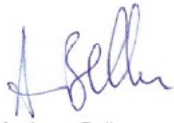

CLARIFICATIONS:

- **The helper springs, if in use, are always assembled in series with the suspension springs.**
- **The helper spring must be separated from the suspension spring only through a specific spring-seat for fixing and diameter adaptation.**

3rd Paragraph: *Rubber bump stops and packers are free.*

CLARIFICATIONS:

- **Only polymeric rebound and bump stops are allowed, rebound springs are forbidden.**
- **Packers are non-elastic elements used to change the contact point of the rebound and bump stops.**

Andreas Bellu / WSC Technical Director
