VW	Golf GTI TCR DSG	R6	1185 kg	- 5kg	1180 kg	60 mm

[1]Endurance Target Racing Weight is car's generic dry weight without driver.
[2]Endurance Minimum Weight is car's imposed minimum dry weight without driver.

Agreed principles:
Assigned Ballast for Endurance Races will be 50% of the Assigned Ballast for TCR Races. For any TCR Series or class with a participation of DSG cars over the 40% of the total number of cars on grid, the Target Racing Weight of the SEQ cars may be increased by the Series Promoter from 10 to 40 kg maximum. Promoters are requested to inform WSC in written form.
