

Technical information

T2021_LR_5

Affect: 1.1.2021

Subject: LUMIRANK Mounting KIT's

Subject:

In According to the different materials of used windshields (glass and polycarbonate) we have developed 2 different installation sets which in future only be used to install the LUMIRANK displays.

In preparation of the 2021 Season we have change all Stripes on all LUMIRANK Display to the 3M VHB Version !

The following versions have been tested to high temperature, peel strength and UV in according the used material glass and polycarbonate and the LUMIRANK Surface.

In this reason do not us other Material or stripes and do not peal of the VHB from the LUMIRANK Display surface.

Spare Stripes are available on Request !

Declaration:

VERSION 1. "PC" (Polycarbonate example GT3) market on the Polybag with a **YELLOW** sticker !

Content: 2 Stripes of **3M VHB** / Velcro with red 3M Liner (VHB Logo)
1 Roll of Black Anti dazzle Tape

VERSION 2. "only GLASS" (example GT4/TC) market on the Polybag with a **GREEN** sticker !

Content: 4 Stripes of Velcro with a Red liner (Red Backside)
1 Roll of Black Anti dazzle Tape

Installation instructions:

General: Ambient temperature must at least 15 degrees on mounting! Complete strength after 24 hours !

A > Clean windscreen with alcohol // B > Set Velcro strip exact on LUMIRANK

C > Peel release liner off stripe, and press Display with strips in place (min 15sec.) please check for less air in between !

Note: Anti Fog or any coating reduce adhesive strength !

Recomandation:

- All Former Install Set's is not to use anymore !
- The VHB Version 20_21 can use on all surfaces ! The Version Glass only on Glass !
